PROFESSIONAL SUMMARY

Full Stack Developer with nearly 2 years of experience building and deploying production-grade web applications. Currently working at a growing startup, where I handle everything from development to deployment across the stack. Experienced in integrating payment systems, video calling, and assessment platforms, with a focus on building scalable and reliable products.

PROFESSIONAL EXPERIENCE

InterviewBuddy — Full Stack Developer..**Jul 2024 - Present**

- Sole developer for the company's revamped and rebranded official website, built from scratch using Next.js and Express; launched successfully with new brand identity and improved SEO.
  - Implemented end-to-end payment systems supporting both domestic (Razorpay) and international (PayPal) payments, enabling real-time booking of different types of interviews.
  - Integrated Zoho CRM for lead management and built a blog system using Strapi CMS.
  - Deployed the site on Dockerized environments using Nginx and Portainer, achieving strong uptime and traffic stability post-launch.
- Served as the lead developer for the B2C portal, responsible for the majority of its architecture, development, and deployment — enabling customers to book, manage, and attend mock interviews seamlessly.
- Engineered and deployed a flexible assessment service supporting multi-format questions and secure candidate environments.
- Developed and integrated a real-time video interview feature, leveraging Twilio for live communication and FFmpeg to optimize video processing and playback.
- Collaborated across product and design teams for major platform redesigns and actively developing a new Gen-AI Interview Service, implementing AI-driven evaluation and feedback modules.

InterviewBuddy — Full Stack Developer Intern ....**Jan 2024 - Jun 2024**

- Rebuilt and redesigned several critical modules of the company's B2B interview platform to improve performance and maintainability.
- Played a key role in the successful deployment and launch of platform version 2.7." or "Assisted in deploying the successful launch of platform version 2.7..
- Developed email automation and notification systems using React Email.
